[Cheap Price] **ACDSee Canvas 11 with GIS Module** Full Version

Canvas 11 with GIS+ is the only GIS data visualization solution in today's market that addresses the need of GIS professionals to communicate the results of their research analysis quickly, accurately, and effectively inside a true graphics application. Simply import GIS project information and then use Canvas' image editing, illustration, and page-layout features to create, assemble, montage, and annotate, and enhance project data. Tasks that previously might have required days of work - or simply could not be accomplished with other graphics applications - can be completed quickly and with stunning results. No other graphics application delivers the comprehensive set of features and toolsets needed to make the most of your GIS investment.
