[Cheap Price] **BusyMac BusyCal** Full Version

Calendar and To Do List Manager for Mac OS X Sync calendars with MobileMe, Google, the iPhone, and over a LAN BusyCal is a desktop calendar that allows families and small workgroups to easily and cost-effectively sync calendars with MobileMe, Google, the iPhone, and with other Macs on a local area network. BusyCal is compatible with other applications, devices and services that support CalDAV or Sync Services, including iCal, iPhone/iPad/iPod Touch, MobileMe Calendar, Google Calendar, Snow Leopard Snow Leopard CalDAV Server, and more. And it's compatible with BusySync, so you can share calendars with both BusyCal and BusySync users on your network. Personal productivity tools BusyCal provides a number of productivity enhancements that you won't find in iCal, including a non-modal info panel; To Dos, including recurring To Dos, that display in the calendar and auto-forward until completed; customizable calendar views including a List View and scrolling Month and Week Views; live weather feeds, moon phases, graphics and sticky notes; customizable font styles and sizes; and a list of today's events in your menu bar
