MixMeister Fusion - The next step in digital DJ creativity MixMeister Fusion set the standard for combining live DJ performance with the pinpoint precision of the best music production software.

Version 7.2 includes breakthrough new features like an enhanced timeline, improved time-stretching and support for Mac OS X. MixMeister Fusion doesn't limit you to simply combining a few loops and grooves together; Fusion is designed to mix complete DJ sets from full-length songs.

You get the functionality of a loop editor or digital audio workstation, but you can blend songs together to create stunning DJ performances. MixMeister Fusion frees you from monotonous tasks like beat matching, setting cue points, and counting beats in your head. It gives you the power to unleash your creativity and shape your music in a million ways, with live looping and remixing, VST effects, harmonic mixing and more. You can manipulate tempo, volume, and EQ in real time, on-the-fly. It even records all your actions (not just the resulting audio), so you can go back, listen to your mix, and make precise adjustments with studio-style editing capabilities. Fusion's live performance capabilities can be expanded via connectivity with MIDI hardware controllers. Export your completed mix as an MP3 or burned to a CD using the integrated burning tools. Whether you use it for live gigs or mix CD production, Fusion lets you achieve true performance perfection.
