MoldWorks ® is the premier 3D solid-based mold design application that delivers innovative, intuitive intelligent design tools for the injection molding industry. * Incorporates process-specific knowledge of moldmaking in CAMD (Computer Aided Mold Design) software. *

MoldWorks ™ intuition is the result of combining expert knowledge with automation and associativity. * Delivers levels of productivity that dramatically outperform traditional mold making software at an affordable price! * Provides time-to-market gains of 2-1 or better! The dynamic preview of the initial mold base and related components significantly reduces the design time from the onset. Then with MoldWorks ™ complete and truly associative parametric mold base, engineering changes are a breeze. The user can modify a give plate, component or the entire mold base effortlessly. MoldWorks intuitive intelligence will propagate the requested change throughout the complete mold. This functionality alone saves users hours of re-design time. To further shorten the design process, MoldWorks automatically creates the 2D drawings of the plates and dimensions them while maintaining complete associativity, thus, leaving other products far behind. With over 15 Commercial Component Libraries (HASCO, DME, National, Progressive, Futuba, etc.), MoldWorks offers MORE libraries that any other product.
